***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: The present invention is directed to an information reproduction apparatus and method. Each independent claim identifies the uniquely distinct feature of instructing the output controlling device to output the decoded image information in the repetition range and to acquire the decoded information subsequent to the repetition range, when the repetitive reproduction controlling device is instructed to begin to perform the repetitive reproduction processing by the repetitive reproduction start instructing device. The closest prior art, Yamada (US5502703) discloses repetitive reproduction, but fails to anticipate or render the above underlined limitation obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***
